ADOLESCENT MEDICINE

The Division of Adolescent/Young Adult Medicine provides state-of-the-art, comprehensive primary care and specialty care to patients, ages 10 to 23 years old. We offer physical examinations, immunizations, sexuality and contraceptive counseling, gynecologic examinations, Pap smears and STD screenings and expert preventive health care to adolescents and young adults. We also provide consultation for patients with complex medical problems, such as eating disorders, menstrual problems, male and female reproductive health problems, weight problems, and chronic fatigue. Our practice includes physicians, nurse practitioners, nurses, nutritionists, HIV counselors, and mental health clinicians.

In addition to offering expert preventive care, our experienced, multidisciplinary staff provides specialty care for adolescents and young adults with a variety of complex medical problems and issues, including:

- chronic fatigue
- delayed puberty
- eating disorders
- family planning
- gynecologic problems
- HIV infection
- hormonal changes
- menstrual problems
- osteoporosis
- polycystic ovary syndrome
- sexually transmitted diseases (STD)
- teen pregnancy
- weight problems

CLINICAL PROGRAMS:

Adolescent/Young Adult Medical Practice

Provides expert evaluation and medical treatment for adolescents and young adults with common and complex medical problems. By taking thorough histories, providing physical exams and diagnostic testing and offering expert counseling services, the practice enables adolescents and young adults to lead healthy and productive lives.

Scheduling: 617-355-7181

Eating Disorders Program

Evaluates and treats adolescents who struggle with an eating disorder. Patients benefit from the multidisciplinary approach to their eating disorder. The team combines the talents of experts in adolescent medicine, mental health (social work, psychology and psychiatry) and nutrition.

Scheduling: 617-355-7178

Reproductive Endocrine Practice

Diagnoses and treats adolescents and young adults with reproductive endocrine problems, such as delayed development, menstrual problems, osteoporosis, and polycystic ovary syndrome. Using state-of-the-art diagnostic testing and treatments, the practice can provide solutions to many reproductive problems.

Scheduling: 617-355-7181

Bone Health Program

Provides comprehensive evaluation of adolescents with low bone density or at risk for low bone density.

DXA Center (bone density measurement) Scheduling: 617-355-3789

General Information/Clinical Appointments: 617-355-0469

Boston HAPPENS Program

Provides clinical care and support services to HIV positive and at-risk youth and provides confidential HIV counseling and testing for all clients ages 12 and up.

Scheduling: 617-355-2735

Breast Clinic

Provides comprehensive, interdisciplinary care to patients who present symptoms of benign breast conditions, such as breast asymmetry or macromastia in girls and gynecomastia in boys. This program is run in collaboration with the Department of Plastic Surgery.

Scheduling: 617-355-4964

Center for Young Women's Health

Provides comprehensive health and education resources. The center empowers adolescent girls and young women to take a more active role in their health and health care decisions. For health information and to learn about a variety of programs and services designed to educate and empower girls and young women ages 12-22, contact 617-355-2994 or visit youngwomenshealth.org.
