EMERGENCY MEDICINE

CLINICAL PROGRAMS:

Boston MedFlight

Boston MedFlight is a critical care transport service created in 1985 as a non-profit public charity by a consortium of Boston teaching institutions, including Children's Hospital Boston. MedFlight provides linkage for the most critically ill and injured patients requiring transport from community hospitals to trauma and tertiary care centers.

Brain Injury Program

Cares for children who have experienced a brain or spinal cord injury, bringing together experts from Emergency Medicine, Critical Care, Neurology, Neurosurgery, Physical Medicine, Rehabilitation, and Occupational and Physical Therapy. Team members are actively involved in injury prevention and research and training programs that aim to reduce the incidence of injuries, and improve outcomes for those who have been injured.

617-355-2490 or 617-355-7269 | childrenshospital.org/braininjury

Center for Biopreparedness

Created to be a national Center-of-Excellence in all pediatric aspects of public health preparedness and consequence management after acts of terrorism and other disasters. The center was launched in June 2003 with the assistance of a contract from the Agency for Healthcare Research and Quality (AHRQ).

617-355-6637 | childrenshospital.org/bioprep

Critical Care Transport

Expert transportation of critically ill or injured children is essential. Our Critical Care Transport Ambulance is staffed by two critical care transport RNs and an EMT-Paramedic. The ambulance itself is unique, carrying all the equipment and medication necessary to earn its reputation as an ICU on wheels.

866-771-KIDS or 617-355-8410

Injury Prevention Program

Committed to decreasing the incidence of injuries through community-based education efforts, distributing safety materials and conducting research on best practices. The program is actively involved in the following programs and organizations: Car and Bicycle Safety, ThinkFirst, Injury Free Coalition for Kids, Greater Boston SAFE KIDS Coalition, SAFE (Seatbelts are for Everyone) Coalition and Safer Homes.

617-355-2754 | childrenshospital.org/injury

Regional Center for Poison Control & Prevention Serving Massachusetts and Rhode Island

Provides 24-hour treatment and advice to health care professionals and the public on all types of poisoning. The center handles more than 65,000 calls a year, providing information and assistance with medication errors, ingestion of household products, bites and stings and exposure to biologic and chemical substances. The center also initiates public education and information campaigns to prevent injuries due to intentional and unintentional poisonings.

1-800-222-1222 | childrenshospital.org/poison

Trauma Program

The Trauma Program at Children's is a leading center in the treatment and care of injured children. The program ranks among the top 10 hospitals in the nation for the volume of injured children treated, and is one of only a few hospitals in the United States to earn a Level 1 Pediatric Trauma Center verification from the American College of Surgeons, indicating the highest level of pediatric injury care.

The program at Children's treats children with a wide range of injuries, from minor to the most severe. Most children treated for trauma suffer blunt injuries from unintentional falls and motor vehicle or bicycle crashes. Others are due to a penetrating injury, a burn or other trauma.

617-355-5400 | childrenshospital.org/trauma

Travel and Geographic Medicine Clinic

In conjunction with Children's Division of Infectious Diseases and General Pediatrics, the Division of Emergency Medicine also operates the Travel and Geographic Medicine Clinic, which provides comprehensive pre-travel services for international travelers, both children and adults.
