## NUCLEAR MEDICINE/PET

The Division of Nuclear Medicine/PET (Positron Emission Tomography) at Children's Hospital Boston is one of the oldest and largest programs of its kind in the country that is completely dedicated to children. Using radiopharmaceuticals, Children's specialists can evaluate metabolic, physiologic and pathologic conditions of the body for the purposes of diagnosis, therapy and research. For more than 35 years, the division has been a nationally recognized leader in the field of pediatric nuclear medicine.

More than 7,000 nuclear medicine procedures are performed here every year utilizing the full range of nuclear medicine technologies, in a safe, comfortable and child-friendly atmosphere.

Disorders frequently diagnosed with nuclear medicine include:

- bone tumors
- brain tumors
- cardiovascular diseases
- cerebrovascular disease
- congenital heart disease
- epilepsy
- gastrointestinal diseases
- infectious diseases
- liver disorders
- lymphatic disorders
- lymphoma
- orthopedic conditions
- pulmonary diseases
- soft tissue tumors
- sports medicine
- thyroid cancer and benign thyroid conditions
- urinary tract diseases

The Division of Nuclear Medicine provides services on the second floor of the Pavilion Building on our Boston campus and in Waltham.
