## **PATHOLOGY**

Since its inception more than 20 years ago, the Department of Pathology at Children's Hospital Boston has grown to become the largest service of its kind in the world. The department maintains its critical role by supporting many clinical activities in the hospital. Our pediatric and subspecialty pathologists interpret thousands of biopsies each year and perform a variety of other procedures in order to provide surgeons and other medical specialists with crucial information.

The services of the Department of Pathology are available 24 hours a day, 365 days per year. The vast majority of the work is accomplished between 7 a.m. and 6 p.m., Monday through Friday. However, there is a staff pathologist and resident on-call continuously for urgent requests, intraoperative diagnoses and autopsies. A technician is also available on Saturdays to handle urgent surgical and cytological specimen processing and interpretation requests. Emergency technical staffing is also available on Sundays.

The department has expertise in the following areas:

- **childhood cancers**
- **dermatopathology**
- **electron microscopy**
- **gastrointestinal biopsies**
- **kidney disease**
- **metabolic and inherited diseases**
- **neuropathology**
- **pediatric cytology**
- **pediatric heart disease**
- **pulmonary pathology**
- **renal pathology**

The Department of Pathology is located at our Boston campus on the first floor of the Bader Building.
