

Pediatric Specialist Guide

A referral guide for health care providers

James Kasser, MD

Children's Hospital Boston

2009-2010

CHILDRENSHOSPITAL.ORG

ANESTHESIA

Childrens Hospital Bostons Department of Anesthesia plays a critical role in the treatment and rehabilitation of patients. Our anesthesiologists specialize in multidisciplinary pediatric and cardiac anesthesiology and are involved in many aspects of patient care. While our primary focus is the safety of our patients before, during and after surgery, we also provide patient care services outside of the the operating room.

Specialized treatments offered include:

- acupuncture
- anesthesia and sedation
- critical care medicine
- pain management

CLINICAL PROGRAMS:

Cardiac Anesthesia Services

Provides sedation, anesthesia and other assistance for a variety of cardiac interventional and surgical procedures.

Critical Care Medicine

Provides a committed excellence in clinical care, education and research in the field of pediatric critical care (see page 69).

Day Surgery

Cares for patients who do not require hospitalization for their surgery.

Medical Acupuncture Service

Provides treatment and support for acute and chronic pain problems in children and young adults.

Medical/Surgical Intensive Care Unit (MSICU)

Cares for critically ill infants and children. All patients requiring extracorporeal membrane oxygenation (ECMO) are cared for in the MSICU (about 60 cases each year).

Pain Treatment Service

Provides treatment and support for acute and chronic pain problems in children and young adults.

Pediatric Pain Rehabilitation Center (PPRC)

The Mayo Family Pediatric Pain Rehabilitation Center (PPRC) is an intensive rehabilitation program that serves the needs of children and adolescents with chronic musculoskeletal and neuropathic pain

Preoperative Clinic

Evaluates and prepares patients and families for procedures which are performed under anesthesia and require hospitalized observation in the early convalescent period.

Sedation Services

Supports patients through painful or frightening procedures that do not require general anesthesia.
